

TECH TALK

June 2011

The school year is winding down but we are still very busy here at the Career Preparation Center. Students have completed career and program portfolios, projects, certification tests, and final exams. April and May were filled with a flurry of activities for our current students, students enrolling for next school year, and of course, our staff. Please read on for updates and information about our programs.

Insurance & Risk Mgmt. Program to Partner with Farm Bureau Insurance

The Insurance and Risk Management program will be delivered at Farm Bureau Insurance Company in Lansing beginning in September. Olivet College will provide instruction in the areas of Insurance/Risk Management, Personal Insurance, and Commercial Insurance. Eaton ISD, Olivet College, and Farm Bureau Insurance will partner to allow students and opportunity to experience the insurance industry first hand while learning about risk management, personal insurance, and commercial insurance. Locating the program at an insurance company will allow for students to engage in learning in very relevant ways, while experiencing the culture of the insurance industry. In addition, students will have an opportunity to earn nine college credits upon successful completion of the program.

Program Openings as of June 8

Auto Collision Repair - AM
Building & Electrical Trades - AM
CAD/Pre-Engineering - AM
Computer Support - AM
Criminal Justice - AM and PM
EMS/Fire Science - PM

Health Technology - AM and PM
Heavy Equipment Repair - AM and PM
