# About This Guide

This Novell® *GroupWise*® 7 *Client Frequently Asked Questions (FAQ)* is intended to help GroupWise client users who have not found the information they need in the GroupWise client online help or User Guides:

- ♦ “How Do I Find What I Need in the GroupWise Client Documentation?” on page 9
- ♦ “GroupWise Windows Client FAQ” on page 11
- ♦ “GroupWise Cross-Platform Client FAQ” on page 17
- ♦ “GroupWise WebAccess Client FAQ” on page 21
- ♦ “Non-GroupWise Clients FAQ” on page 25
- ♦ “GroupWise Client Comparison” on page 27
- ♦ “Where Do I Go for More Help?” on page 35
- ♦ “Documentation Updates” on page 37

## Audience

This guide is intended for GroupWise users.

## Feedback

We want to hear your comments and suggestions about this manual and the other documentation included with this product. Please use the User Comment feature at the bottom of each page of the online documentation, or go to [www.novell.com/documentation/feedback.html](http://www.novell.com/documentation/feedback.html) and enter your comments there.

## Documentation Updates

For the most recent version of the *GroupWise 7 Client Frequently Asked Questions (FAQ)*, visit the [Novell GroupWise 7 Documentation Web site \(http://www.novell.com/documentation/gw7\)](http://www.novell.com/documentation/gw7).

## Additional Documentation

For additional GroupWise documentation, see the following client guides at the [Novell GroupWise 7 Documentation Web site \(http://www.novell.com/documentation/gw7\)](http://www.novell.com/documentation/gw7):

- ♦ *GroupWise Windows Client User Guide*

## Documentation Conventions

In Novell documentation, a greater-than symbol (>) is used to separate actions within a step and items in a cross-reference path.

A trademark symbol (® , ™, etc.) denotes a Novell trademark. An asterisk (\*) denotes a third-party trademark.

When a single pathname can be written with a backslash for some platforms or a forward slash for other platforms, the pathname is presented with a backslash. Users of platforms that require a forward slash, such as Linux\*, should use forward slashes as required by your software.

When a startup switch can be written with a forward slash for some platforms or a double hyphen for other platforms, the startup switch is presented with a forward slash. Users of platforms that require a double hyphen, such as Linux, should use double hyphens as required by your software.

# How Do I Find What I Need in the GroupWise Client Documentation?

- ❑ [Step 1: Online Help in the GroupWise Client](#)
- ❑ [Step 2: User Guides on the GroupWise Documentation Web Site](#)
- ❑ [Step 3: User Comments Link in the User Guides](#)
- ❑ [Step 4: GroupWise Support Forum](#)

## 1.1 Step 1: Online Help in the GroupWise Client

All three GroupWise® clients offer online help.

- ◆ **Windows Client:** Click *Help > Help Topics* and *Help > Interactive Tutorial*.
- ◆ **Cross-Platform Client:** Click *Help > Help Topics*.
- ◆ **WebAccess Client:** Click *Help*.

The online help in all three clients offers three ways to access the information provided in the help:

- ◆ **Contents:** Provides task oriented (“How Do I”) access to the help information. This is a great place for beginners to get started.
- ◆ **Index:** Provides alphabetical access to common tasks and features. This is a great help when you know what you want to do but you can’t figure out how to do it.
- ◆ **Search:** Provides a full text search of the help information based on keywords. If the index doesn’t have it, the full text search should.

If the online help doesn’t help you, proceed to [Step 2: User Guides on the GroupWise Documentation Web Site](#).

## 1.2 Step 2: User Guides on the GroupWise Documentation Web Site

All three GroupWise clients have a User Guide posted on the [GroupWise 7 Documentation Web site](http://www.novell.com/documentation/gw7) (<http://www.novell.com/documentation/gw7>) that is easy to access:

- ◆ **Windows Client:** Click *Help > User Guide*.
- ◆ **Cross-Platform Client:** Click *Help > User Guide*.
- ◆ **WebAccess Client:** Click *Help > User Guide*.

The User Guides are provided in both HTML and PDF format. Both formats are searchable and yield different kinds of search results.

- ◆ **HTML Search:** To search the HTML version of a User Guide, click the main link to the guide on the [GroupWise 7 Documentation Web site](http://www.novell.com/documentation/gw7) (<http://www.novell.com/documentation/gw7>),

then select the sections of the guide that you want to search in the left pane. All sections of the guide are selected by default. Type the word or phrase to search for, then click *Search Checked Items For*. Web search technology is used to return pages where the word or phrase is found in the User Guide, ranked according to the likelihood that the page is what you're looking for.

- ♦ **PDF Search:** To search the PDF version of a User Guide, click the PDF link to the guide on the [GroupWise 7 Documentation Web site \(http://www.novell.com/documentation/gw7\)](http://www.novell.com/documentation/gw7). Click *Find* (the binoculars icon), type the word or phrase to search for, then click *Find* to find the first instance. Click *Find Again* to continue searching through the document for instances of the word or phrase. This full text search procedure is more thorough than the Web search approach.

---

**TIP:** When you are in the HTML version of a User Guide, you can click *View PDF* at the top of any page to immediately open the PDF version of the User Guide.

---

If the User Guide doesn't help you, proceed to [Step 3: User Comments Link in the User Guides](#).

## 1.3 Step 3: User Comments Link in the User Guides

If you have searched the online help and the User Guide for the GroupWise client you are using and you still cannot find the information you need, you can submit a user comment about the documentation. Just click *Add Comment* at the bottom of any page of the HTML version of the documentation.

---

**IMPORTANT:** For best results, submit your comment on the page of the User Guide where you tried to find the information.

---

When you submit a user comment, one of the following things happens:

- ♦ We know where the answer to your question is in the current documentation. We send a response to you to help you find the information you need.
- ♦ We know the answer to your question and we discover that it is not in the current documentation. We send a response to you and post the information on the page where you made your comment. The information will be added to the next version of the GroupWise documentation.
- ♦ We don't know the answer to your question. We find the answer to your question, then proceed as described above.
- ♦ We technical writers can't help you resolve problems with the GroupWise software. When GroupWise doesn't work for you the way it's supposed to, we refer you to [Step 4: GroupWise Support Forum](#).

---

**NOTE:** Response times vary.

---

## 1.4 Step 4: GroupWise Support Forum

The [GroupWise Support Forum \(http://support.novell.com/forums/2gw.html\)](http://support.novell.com/forums/2gw.html) provides assistance from over 30 volunteer sysops from around the world, not to mention helpful GroupWise users from around the world as well. If the GroupWise client isn't working for you as documented, post your problem on the GroupWise Support Forum for free assistance.

**NOTE:** External cross-references in the section are found in the *GroupWise 7 Windows Client User Guide*.

---

### **How do I customize the Home View?**

See “[Understanding the Home View](#)” and “[Using Panels](#)”.

### **Help! I've had fun playing with my Home View. Now how do I put it back?**

Right-click the *Home* icon, then click *Properties > Display > Customize Panels > Restore Defaults*.

### **How do I get rid of the little monthly calendars that weren't there in my GroupWise 6.5 Calendar Week view?**

Right-click the *Week* button on the Calendar View bar, then click *Properties*. Select *Week*, then click *Edit*. Select *Week* instead of *Week (Default)*, then click *OK*.

### **How do I set up an automated response to let people know that I'm on vacation or out of the office?**

See “[Creating a Vacation Rule or Auto Reply](#)”.

### **How do I add text, such as contact information, to the bottom of every message I send?**

See “[Adding a Signature or vCard to Items You Send](#)”.

### **My personal information in the GroupWise Address Book is out of date. How do I update it?**

You cannot edit the information in the GroupWise Address Book yourself. You must contact your GroupWise administrator in order to update your personal information.

### **How do I change the way my name appears in messages?**

See “[Changing Your Display Name](#)”. If the conditions described in this procedure do not apply to your circumstance, you must have your local GroupWise administrator use ConsoleOne<sup>®</sup> to change how your name appears.

### **How do I display just my unopened items?**

The default Home View includes an Unread Items panel, as described in “[Understanding the Home View](#)”.

If you don't use the Home View, you can create a Find Results folder, as described in “[Understanding Find Results Folders](#)”. Use an Advanced Find, and set it up so that Item Status does not include Opened (or any other status that you do not want listed in the Find Results folder). You can then look in this folder to see all your unopened items as a group.

## How do I get notified of incoming messages?

See [“Running Notify”](#).

## How do I turn on sound or change the sound of my appointment notifications?

When Notify is running, you have a *Notify* icon (a small globe with a letter) in your Windows notification area. Right-click the *Notify* icon, then click *Options > Alarms*. Select *Play Sound*, then select the sound file you want to play.

## Can I set an alarm on a task?

At present, you can't set alarms on tasks. Alarms can only be set on items that appear in your Calendar.

## Can I send automatic e-mail reminders to other users?

For a single message, you could use the Delay Delivery feature to have a message delivered on a specified day at a specified time. See [“Delaying Delivery of an Item”](#). However, the Delay Delivery feature cannot be used in conjunction with recurring items. If you want to remind others of something every two weeks, for example, you must set up each reminder individually.

## How do I schedule an annual event, like a birthday or anniversary?

See [“Scheduling Auto-Dates by Formula”](#) if you want to use reminder notes, or see [“Scheduling an Appointment for Yourself”](#) if you want to use all-day events.

## How do I change my default font for composing and viewing messages?

See [“Changing the Font of Items You Send”](#), [“Changing the Font of Items You Receive”](#), and [“Setting the Default View”](#).

## How do I turn on or turn off the header on messages I print?

For a Plain Text formatted message, right-click the message, then click *View*. Click *Print (Preview) Options*, then select or deselect *Print Header* as needed.

For an HTML formatted message, the message displays and prints according to your current Internet Explorer browser settings (*File > Page Setup > Headers and Footers*).

## What do all the little symbols next to my messages mean?

See [“Icons Appearing Next to Items in Your Mailbox, Sent Items Folder, and the Calendar”](#).

## Someone gave me proxy access to a mailbox. How do I access it?

See [“Managing Someone Else's Mailbox or Calendar”](#).

## How do I change the ownership of a shared folder?

At present, there is not an easy way to transfer ownership of a shared folder from one user to another. As a workaround, one of the users with whom the folder is shared can create a new folder and move the contents of the shared folder into it, then share that new folder with the other users,

thus becoming the owner of the newly shared copy of the original shared folder. The new owner must have full rights to the original shared folder.

### **Help! My folder list has disappeared. How do I get it back?**

Click *View > Folder List*. If you're in a context where that doesn't work, click *Tools > Options > Environment > Appearance > Display Folder List*.

### **Help! A column header has disappeared. How do I get it back? And how do I add more columns?**

Right-click an existing column heading, click *More Columns*, then select the columns you want to display.

### **Where is the Accounts menu that I need in order to set up a POP or IMAP e-mail account in GroupWise?**

The *Accounts* menu is available only if your GroupWise administrator has enabled this feature, as described in “[Modifying Environment Options](#)” in “*Client*” in the *GroupWise 7 Administration Guide*. Ask your GroupWise administrator to enable the feature.

### **Can I delete attachments from a received message?**

No. Not at the present time.

### **In the Attach File dialog box, how do I set the default file listing to Details (to include file size, type, and date) instead of List (which just lists the filenames)?**

Unfortunately, you cannot change the default list presentation in GroupWise® or in the Windows\* operating system environment.

### **How do I forward all my mail from my GroupWise account to a personal e-mail account?**

See “[Creating a Rule to Forward All Mail to a Private Mail Account](#)”.

### **Can I send a message to a cell phone?**

Most cell phones include an e-mail address for SMS messages. If you want to forward your messages to your own cell phone, you need to contact your carrier to determine the e-mail address of your phone. If you want to send a message to someone else's cell phone, you need to know the e-mail address of that person's phone.

### **How do I move my archive?**

In the Windows client, click *Tools > Options > Environment > File Location*, then look at the *Archive directory* path to see where your archive is right now. Delete the current location and save the blank setting of no archive directory, so that no archiving can be performed while you are moving the archive. Copy your archive directory to the desired location, then go back to *Tools > Options > Environment > File Location* and provide the new location. Make sure you can access your archive in the new location, then delete the archive from the original location to conserve disk space.

### **Why are there discrepancies between the folder structure in my archive and in my Online or Caching mailbox?**

Theoretically, the folder structure in your archive should match the folder structure in your mailbox. However, over time, you have probably renamed folders, deleted folders, and moved folders as you worked on your mailbox. The archive does not keep up with all these changes to the mailbox folder structure. Therefore, sometimes items aren't archived where you expect them to be archived. Sometimes you need to use the Find feature to locate archived items.

This issue is more frequent with users whose GroupWise archives date back through numerous GroupWise releases.

### **Can I transfer my GroupWise archive onto a CD to save space on my workstation and then access it from the CD when I need to refer to old items?**

If you copy your GroupWise archive onto a CD, it is marked read-only. At present, GroupWise cannot open a read-only archive. You can copy it from the CD back into a read-write environment in order to access it.

You set your archive location using *Tools > Options > Environment > File Location > Archive Directory*. You need to be careful that your archive location is always set to the correct directory where you want ongoing automatic archiving to take place. At present, we do not recommend or support multiple archive locations, although it is possible.

### **How do I get GroupWise to start maximized?**

Manually size the GroupWise client window by dragging its borders to occupy your full screen. Do not use the *Maximize* button. If you want GroupWise permanently maximized, you can right-click the GroupWise desktop icon, then click *Properties*. In the Run drop-down list, select *Maximized*.

### **I've run out of space in my mailbox. I've deleted everything I can think of. Now what?**

You need to actually empty the Trash before your disk space consumption goes down.

## **I'm used to the GroupWise Windows client. What differences am I going to see when I use the WebAccess client?**

See “GroupWise Client Comparison” on page 27.

## **Where's the Home tab?**

The Home view is a new feature in the GroupWise® 7 Windows client. It is not yet available in the WebAccess client.

## **How do I stop my password from being automatically provided on the WebAccess login page?**

This functionality is being provided by your Web browser, not by the WebAccess client. Consult your Web browser documentation for instructions on disabling this feature.

### **What do I do if my session times out while I'm working on a message?**

If your GroupWise administrator has configured WebAccess as described in “[Setting the Timeout Interval for Inactive Sessions](#)” in “[WebAccess](#)” in the *GroupWise 7 Administration Guide*, you should not lose a message you are working on when your session times out. If you do lose messages under these conditions, contact your GroupWise administrator.

### **How do I set up an automated response to let people know that I'm on vacation or out of the office?**

See “[Using Rules](#)”.

### **How do I add text like contact information to the bottom of every message I send?**

See “[Adding A Signature to Items You Send](#)”.

### **My personal information in the GroupWise Address Book is out of date. How do I update it?**

You cannot edit the information in the GroupWise Address Book yourself. You must contact your GroupWise administrator in order to update your personal information.

### **How do I change the way my name appears in messages?**

You must have your local GroupWise administrator use ConsoleOne<sup>®</sup> to change how your name appears.

### **What do all the little symbols next to my messages mean?**

See “[Understanding the GroupWise WebAccess Main Window](#)”.

### **Why do messages keep disappearing from my mailbox?**

GroupWise performs cleanup activities on your mailbox, such as archiving or deleting old messages, on a regular basis. When you use the WebAccess client, items are archived or deleted according to the default settings provided by your GroupWise administrator in ConsoleOne<sup>®</sup> or according to settings you provide in the GroupWise Windows client or the Cross-Platform client, as described in:

- ♦ “[Archiving Items Automatically](#)” in “[Managing Your Mailbox](#)” in the *GroupWise 7 Windows Client User Guide*
- ♦ “[Archiving Items Automatically](#)” in “[Managing Your Mailbox](#)” in the *GroupWise 7 Cross-Platform Client User Guide*

### **How do I block unwanted messages from my mailbox?**

In the WebAccess client, you are dependent on whatever your GroupWise administrator has set up for your GroupWise system, as described in “[Blocking Unwanted E-Mail from the Internet](#)” in “[Internet Agent](#)” in the *GroupWise 7 Administration Guide*.

When you use the GroupWise Windows client, you have more control over what you allow into your own mailbox, as described in “[Handling Unwanted Mail](#)” in “[Working with Items in Your Mailbox](#)” in the *GroupWise 7 Windows Client User Guide*.

If you have a small number of specific addresses that you want to block, you can set up a rule, as described in “[Using Rules](#)”.

**Can I delete attachments from a received message?**

No. Not at the present time; however, there are free, third-party attachment-strippers. See [Cool Solutions \(http://www.novell.com/coolsolutions/gwmag/\)](http://www.novell.com/coolsolutions/gwmag/) for more information.

**Someone gave me proxy access to a mailbox. How do I access it?**

See “[Using Proxy](#)”.

**How do I forward all my mail from my GroupWise account to a personal e-mail account?**

See “[Forwarding Your E-mail to Another Account](#)”.

**Can I send a message to a cell phone?**

Most cell phones include an e-mail address for SMS messages. If you want to forward your messages to your own cell phone, you need to contact your carrier to determine the e-mail address of your phone. If you want to send a message to someone else’s cell phone, you need to know the e-mail address of that person’s phone.

**I’ve run out of space in my mailbox. I’ve deleted everything I can think of. Now what?**

You need to actually empty the Trash before your disk space consumption goes down.

# GroupWise Client Comparison

# 6

The GroupWise<sup>®</sup> product includes four clients for accessing your GroupWise mailbox:

- ♦ **Windows Client:** A proven e-mail client for over a decade, the GroupWise Windows client is a robust, full-featured access point from your Windows desktop to your GroupWise mailbox. It offers a wide array of features to meet the needs of basic to advanced users.
- ♦ **Cross-Platform Client:** First introduced in 2004, the relatively young GroupWise Cross-Platform client offers the most vital GroupWise features to Linux\* and Macintosh\* users, with additional GroupWise functionality being added with each new GroupWise release.
- ♦ **WebAccess Client:** The WebAccess client provides access to your GroupWise mailbox in any environment (Windows, Linux, and Macintosh) where a browser and an Internet connection are available. In addition, using the WebAccess client, you can access your GroupWise mailbox from wireless devices such as phones, Palm OS\* devices, and Windows CE devices. Some GroupWise functionality is limited because of the difficulty of implementing it in a browser-based environment. However, some advanced functionality has been implemented using Java\* applets.
- ♦ **Outlook Connector:** First introduced in GroupWise 7, the GroupWise Connector for Outlook\* allows you to access you to use Outlook to access your e-mail, calendar, and other collaboration data that is stored in a GroupWise mailbox. With the GroupWise Connector for Outlook, you can continue working in the Outlook environment you are accustomed to without being trained on using GroupWise.

The following tables compare the tasks that can be performed in the various GroupWise clients:
